- Level 2 Railway Engineering and Maintenance (Jan 2025)
- Level 3 Diploma Cybersecurity & Networking (Feb 2025)
- Ethical Hacker – Cisco (Jan 2025)

## PROJECTS

1. **The People News** - Developed a responsive news aggregator using HTML, CSS, and JavaScript as a personal project for fun. Initially created for my news and meme-focused Instagram page, this project helped me gain valuable experience in implementing user authentication systems, including login and sign-up functionalities. [View Project](<https://enochaseks.github.io/The-People-News/>)

2. **Deep OL Clean** - Designed and developed a cleaning service website and booking system using HTML, CSS, JavaScript, and EmailJS for handling form-based inquiries. This project was created for my cousin's business to provide an efficient online presence and support for his services. Through this experience, I gained valuable insights into JavaScript and learned how to build user-friendly and fast-performing systems. [View Project](<https://enochaseks.github.io/deep-ol-clean/>)

3. **Yumm Yumm** - Developed an online restaurant platform using HTML, CSS, and JavaScript, marking my first-ever application built for my business. The platform features a menu showcasing Nigerian, Ghanaian, and English-inspired cuisines, with a focus on delivering authentic dishes and delightful desserts from Nigeria and Ghana. [View Project](<https://enochaseks.github.io/Yum-Yumm/>)

4. **Folo (Upcoming App)** - Developing a Flutter-based mobile application with MongoDB as the backend and robust cloud security features. This app is specifically designed to support African and Caribbean businesses and services, providing them with greater visibility and access to a broader customer base. Additionally, it offers a platform for entrepreneurs from African nations and Caribbean islands to showcase their businesses and services to a global audience.
